

Fausto Márquez Cavallo

FULL STACK ENGINEER

+7 YEARS OF EXPERIENCE

30 YEARS OLD – MONTEVIDEO, URUGUAY (UTC-03:00)

About Me

I adapt quickly and genuinely enjoy technology. In my free time, I often explore new tools or read newsletters about software systems and engineering practices.

I'm always looking for interesting challenges where I can grow and help improve how things are built. **I shine when I can take ownership**, make decisions, and drive products, features, or projects forward.

I'm a fan of doing things right.

Experience

2024 (current) – Senior Engineer at Sightly

sightly.com

Leaders in real-time, data-driven marketing for brands.

My work here involves system refactors and providers migrations, integrating new technologies like Elasticsearch and Vite to improve maintainability, scalability, and performance.

TECH STACK

NodeJs, React, Tailwind, Elasticsearch, PostgreSQL, Typescript

2022 – Tech Lead at Doctari

doctari.com

Telemedicine platform. They were changing their business model and chose me to help match their new needs with a brand-new system and architecture. I developed the entire working methodology and set up the tech needed for it. I supervised and developed components across each phase, from design to deployment.

TECH STACK

Django REST, React, Docker, AWS, Nginx

2021 – Full Stack Developer at Razorvision Consulting

razorvision.net

Consulting firm for the financial and tech industries.

I worked closely with product teams and clients, contributing to system design, developing new features, and maintaining client systems.

TECH STACK

Django, Django REST, React, Tailwind

2020 – Django Developer at Trafilea

trafilea.com

Big eCommerce group with 30 million users shopping every month.

I worked primarily on the migration of their checkout subsystem to a new one.

TECH STACK

Django, Tailwind, Docker, AWS

2019 – Full Stack Developer at Doctari

doctari.com

Telemedicine platform with real-time video calls for medical appointments.

I was hired to develop new features and maintain the system as the company scaled into new markets and gained more clients.

TECH STACK

Django REST, React, Docker, AWS, Nginx

2018 – Junior Web Developer at Hacknoid

hacknoid.com

Cybersecurity tool. I helped migrate the system from a monolithic architecture to a service-based architecture with a separate client.

TECH STACK

jQuery, Handlebars, Bootstrap, Django REST, PHP

Side Projects and Freelancing

The following projects were entirely designed, implemented, deployed, scaled and maintained by my team and I on evenings and weekends.

ShowApp

showapp.com.uy

Social lifestyle app for discovering events and attending experiences.

TECH STACK

React Native, Django REST, Portainer, AWS, BigQuery

Turnolink

turnolink.app

Scheduling platform for healthcare and beauty services.

TECH STACK

NextJS, Django REST, PostgreSQL, MUI

Mañungo

manungo.cl

Food ordering platform for events with logistics optimization.

TECH STACK

jQuery, Bootstrap, Django REST, AWS

Famil-e

famil-e.cl

Personalized grocery shopping platform with task automation.

TECH STACK

React, MUI, Django REST, AWS, Redis

IT Education

Computer Engineering – UdeLaR University, Montevideo, Uruguay.

Online courses, books and newsletters – Udemy, FreeCodeCamp, Platzi, ByteByteGo, Geeks for Geeks, Real Python, etc.
